

Effective Project Management Consultancy

Pass PMP® Exam with confidence

1. Bill is a senior project manager in PlanetEarth Constructions. PlanetEarth has undertaken a project of constructing a large hotel. Bill's team is collecting the requirements. Bill and his team feel that there should be a document which maps the requirements to the business needs and project objectives. This will ensure that client will be comfortable about the team's understanding of requirements and will sign off the requirements documentation. This is essential to control the scope creep. In which document Bill and his team can map the requirements to business needs and project objectives?
 - a. Idea and Mind Mapping Documents
 - b. Business Rules
 - c. Requirements Traceability Matrix
 - d. Project Charter

Answer to the question

1. C) Requirements Traceability Matrix (*PMBOK® Guide Edition 5*, Page 118. Requirements Traceability Matrix is a matrix containing links to all requirements from their origin to the deliverables required to satisfy them. This is an output of Collect Requirements Process)
